Subject: Microsoft Settlement

Dear Madam / Sir,

This is in regard to Microsoft antitrust settlement case. I sincerely feel if Microsoft continues to follow the current practices, it will pose a grave challenge to the principle on which the capitalism is based, free and healthy competition.

Simply put, if not curbed right now, following thing will happen. Your children will wake up listening microsoft radio station on microsoft radio. They will wear clothes made by microsoft, travel in microsoft made car to office, where they work on windows and MS Office. Later in evening, they will come back and watch Microsoft television. Before sleeping, they will read microsoft printed Bible. And when they will open microsoft printed dictionary to read the meanings of words freedom and customer choice, they will hate you with their whole heart.

Thanking you,

Kedar Soman
